

## HSB News Brief

In early 2007, HSB International signed a contract to dismantle and ship a 180 inch (4572 mm) fine paper machine, two folio sheeters, one cut-size sheeter, two wrapping lines with conveyors, and a roll grinder with crane. After a couple of delays, all of the equipment was finally relocated to India in August of 2007.

In November of 2008, HSB visited the client's greenfield paper mill site to inspect the rebuilt machinery, survey the paper mill site, and inspect other paper mill services being installed, including a brand new deinking line.

The paper making machinery was relocated from Cornwall, Ontario, Canada.

HSB congratulates the client and wishes them success in their papermaking endeavours.

Paper machine press and dryer sections still installed in Canada.
